Site Planning • Landscape Design

P R O F I L E

RDA Landscape Architects is an award-winning Landscape Architecture firm who plans intelligent site solutions to enhance the outdoor places and spaces where we live, learn, work and play. With offices in St. James, Long Island, NY and Chesapeake, VA, we provide site and landscape design services throughout the NY metropolitan area, southeastern Virginia and northeastern North Carolina.

Our mission is to enhance the quality of life in our communities by improving the way in which people interact with and within the landscape and by reducing the negative impact that human use has upon the landscape. We pride ourselves on long-term direct Client partnerships as well as productive collaborations with other design professionals to provide comprehensive and thorough problem solving services based on these values:

- **Service:** We are committed to building strong and long-lasting relationships based on trust, honesty and integrity - we listen and respond to the needs of our Clients, treating them as partners.
- **Stewardship:** We are committed to being managers for our Clients and of our world ecology.
- **Synergy:** We are committed to a dynamic and integrated team approach to planning and design.
- **Perspective:** We are committed to helping our Clients see and understand their project in different ways in order to create the best possible solutions.
- **Optimism:** We are committed to generating excitement about each and every project and letting this passion guide us through the design process.

We believe a project's design already exists within the context of a site and our goal is to discover, foster and develop it by blending the aesthetic and pragmatic aspects of Planning, Landscape Architecture and Site Engineering into a comprehensive solution.
